¹ Esegue le funzioni di spegnimento del prodotto, emissione di un suono di allarme, accensione delle luci, chiusura contatto per allarme remoto.

² UTILIZZO INTENSIVO: è obbligatorio installare un demineralizzatore ad osmosi inversa (2°F), al fine di eliminare i sali nell'acqua dal generatore di vapore; UTILIZZO SALTUARIO si consiglia un impianto di decalcificazione semiautomatico della caldaia, il quale richiede ogni 500 ore circa, un intervento di manutenzione e pulizia. I costi di manutenzione ordinaria della **decalcificazione caldaia** sono a carico del cliente.

Caratteristiche elettriche:

Tensione 230V IP+N / 50/60Hz

Allestimenti:

Hammam
Hammam/hydro

Caratteristiche Idrauliche:

Pressione dinamica ottimale 2-5bar
Acqua calda/fredda 1/2" doccia
Acqua fredda 1/2" generatore vapore*
Allaccio scarico Ø40 mm

*Alimentazione idrica generatore di vapore:

Per uso intensivo è obbligatorio installare un demineralizzatore acqua ad osmosi inversa non fornito (2°F).
Per un uso saltuario è disponibile un sistema di decalcificazione semiautomatica della caldaia.
